# EASY BANNER AD CASH!

In this section I've included a copy of the follow-up training issue that I wrote specifically for my 5iphon.com members and subscribers, which includes some really helpful information (and secrets!) on how to benefit with this resource (the B.A.D. 150)...

The tips here really apply to running banner ads for ANY Internet marketing or 'make money online' related offer, so whether you're a 5iphon.com member or not, this info. could greatly benefit you as well...

*Hey it's Bryan with a \*hot\* freebie for you today that will help you get more leads (and \*sales\* - if you're an EXTREME Member) with your Siphon viral website!*

*For whatever reason, some people say banner ads don't work...*

*And for whatever reason - those people are NUTS ;-)*

*Banner advertising works, and it's actually how I \*launched\* 5iphon.com!...*

*I didn't gather a ton of JV partners for a huge launch...*

*I didn't list on JVNotifyPro or any of the launch networks...*

*None of that.*

*And yet I reached the Top 10 in the Clickbank marketplace (for "Gravity") in the Ebusiness category, out of thousands of products!*

*All starting from ONE banner ad placed on another site of mine.  Pretty amazing.*

*That banner makes over $1 per click (meaning it averages $1 in profit for every person that clicks on the banner). And $1 per click is considered a very good EPC (earnings per click).*

*I happen to LOVE banner advertising because it's SO quick and simple - and means instant, \*autopilot traffic and sales\* when done right...*

*You find a website or blog tightly related to your niche - which in the case of 5iphon.com is a site or blog that relates to making money online or Internet marketing (things like that).*

*You give them your banner ad...*

*And you give them the LINK that you want people sent to, when they click your banner ad.*

*Simple!!*

*Obviously as a 5iphon.com member, the link you'd provide is your Siphon referral link...*

*And there are banner ads available inside the member area. Tip: The \*bottom\* banner ad found inside your 5iphon.com member area is the one I have had the best results with so far.*

*Now, what I've done for you is pay my virtual assitant $100 to compile a list of 150 top ranking websites and blogs that offer \*banner advertising\*!*

*DOWNLOAD IT HERE FOR FREE:*

*xxxxxxxxxxxxxxxxxxxxxxxxxxxxx*

*This resource makes things VERY easy for you, since you can go right down the list, check out any site you want, and contact them for banner ad placement.*

*Keep in mind you're looking for sites that offer 300 X 250 banner ad spots IF you want to use the banner ads that are ready-made for you inside the 5iphon.com member area.*

*But otherwise, have a banner ad designed FOR you (an exclusive one all your own), \*any\* size you want, at Fiverr.com - for just $5 a banner!*

Do a search on Fiverr.com for
"banner ad creation" or "banner ads"
or "banner graphics", and find a seller
with POSITIVE FEEDBACK to do
your custom Siphon banner for you...

Inside the 5iphon.com member area
you'll also find little "one liner" ads
that would be PERFECT to use for
having banner ads done for you. So
feel free to use them for this exact
purpose!

HOT TIPS:

- My banner ad directory lists some
"techie" sites as well, so not ALL of
them relate tightly with Internet marketing
and making money online *specifically*...

So keep that in mind, since you want
to run you banner ads on ONLY the
sites tightly related to making money
online... Just target those sites and
blogs and you'll be fine.

- You can usually bargain for better
deals on running you banner ads.
So don't be afraid to negotiate!!

- Test *small* until you get some
experience!  Don't run a $500 banner
ad right off the bat.  You want to practice
first.  Get a profitable campaign going
with $10 or $20 on a less popular site.
And *then* you can start going bigger
by reinvesting some of your profits.

IMPORTANT "DUE DILIGENCE":

You can search sites on Alexa.com
to get their traffic ranking.  The LOWER
the number on Alexa.com, the *more*
popular the site is.  A site with an
Alexa ranking of around 50,000 is
fairly popular.  If you're not sure what
a "good deal" is for a particular banner
ad placement, check out the Internet

marketing forums FIRST... Post your question on the WarriorForum.com or elsewhere, and simply *ask* the experts there if the banner ad prices for a particular site look fair.

You can also ask the website owner how many clicks you can "expect" to receive on an average banner ad of the specific size you're looking to run (the bigger the banner and more prominently placed on a particular site, generally the MORE clicks it will receive, and therefore the more you'll pay).  Ask for *recent* screenshots of traffic stats, or proof in another form. A subscriber to your list is easily worth .50 to $1 *each* in value, so it's easy to calculate if what you're spending on your banner ads is worth the money.

You could also simply click on a few of the ads *currently* running on the site, and ask the people running their banners if they're happy with the results!

...Those are 3 *easy* ways that you can check things out and get a good feel for the ad placement *before* you spend your money.  So keep those in mind and just take it slow your first few deals especially.

- Try running simple banner ads that look like TEXT ads ("headline banners"), and that also include the underlined words in blue font:  CLICK HERE

...So in other words, you have a big bold headline that sparks curiosity and makes people want to click. And then underneath or nearby, you have the words "CLICK HERE" in blue, underlined text.

Try putting the main headline in big red, bold font as well.

*...Obviously this tip applies if you're having somebody create a custom banner ad for you - or for those able to create their own simple banner ads.*

*- Advanced option:  Use a tracking service such as www.clixtrac.com to track your ads.  This is not my service nor is it my affiliate link.  It's a service I use myself, and am simply recommending.*

*With clixtrac.com, you can set up separate tracking for each banner ad you're running, and see how many unique visitors that banner ad produces.  You could even arrange a special deal with website owners where you pay them for unique \*clicks\* instead of paying a month's fee (or similar) where your results aren't certain.*

*Example:  Offer the website owner .20 cents per click on your banner ad. Clixtrac.com offers a feature where you can allow others to view your tracking link stats outside of your tracking account - meaning you can arrange to show the website or blog owner how many clicks your banner ad (the one you're running on their site) has received.*

*...And then you simply offer to pay based on number of unique clicks times the agreed upon cents per click, per month (or whatever).*

*Again, this is an \*advanced\* option and not something you'd set up right away.  Instead, run CHEAP banner ads on less popular sites, and keep an eye on your subscriber stats to see if they're producing results. As simple as that :)*

*-------------------------------------------*

*What's really, really AWESOME about banner advertising is that once*

*your banner is placed (which is easy
to begin with), your results come on
TOTAL AUTOPILOT...*

*Think about it.  Your banner ad is
placed on a targeted website or blog
and links directly to your Siphon
website.*

*There's literally \*nothing\* for you to
do besides keep an eye on the stats
and let the results roll in!*

*If you do NOT get results, don't be
afraid to ask if the website or blog
owner can run your banner ad longer
than the agreed upon time.*

*This really is \*autopilot\* marketing
at its best.  And the only initial "work"
is finding the right site (or sites), and
negotiating the right price(s) to run
your ads!*

*From there, send them you banner.
Send them your website link. And
that's IT!!  It really doesn't get any
easier :)*

*By combining solo ads, banner ads,
and ad swaps, you're set to become
an Internet marketing POWERHOUSE :)*

*I hope you've enjoyed this lesson and
don't forget your FREE DOWNLOAD
valued at $100 (actual price paid):*

*xxxxxxxxxxxxxxxxxxxxxxxxxxxx*

*Bryan Winters*

*P.S. You can obviously use my banner
ad directory for ANY Internet marketing
or 'make money online' related offer, not
JUST your Siphon website.  So this is
a resource that you can get a ton of
use out of for a long time to come :)*

*My free $100 gift to you!*
